

Solify FT-01 Flooring Tile Adhesive

Solify FT-01 Flooring Tile Adhesive is a high-quality, polymer-modified adhesive specifically designed for floor tile installation. Whether you're working on residential or commercial projects, Solify FT-01 ensures a strong bond and reliable performance.

Advantages

- Strong Bond
- Easy Application
- Water Resistance
- Suitable for ceramic tile,
- Vitrified Tiles at flooring

Technical Data

FT 01

7.43 sq.m
@ 3 mm
(as per lab Conditions)

FT 01 is a polymer modified cement based tile mortar used for laying ceramic tiles and ordinary vitrified tiles.

Solify WT-02 Wall Tile Adhesive

Solify WT-02 Wall Tile Adhesive is a high-performance, polymer-modified adhesive designed for the secure installation of wall tiles. Its unique formula offers superior bonding strength, ensuring a durable and long-lasting hold for your tiling projects. Ideal for both residential and commercial applications, Solify WT-02 is your go-to solution for a flawless tile finish.

Advantages

- Strong Bond
- Easy Application
- Water Resistance
- Suitable for ceramic tile,
- Vitrified Tiles at flooring

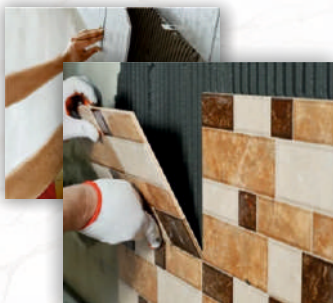

Technical Data

WT 02

7.43 sq.m
@ 3 mm

(as per lab Conditions)

WT 02 is a premium polymer modified tile mortar, used to apply large size vitrified tiles to floors and walls on concrete and plaster bases. It is also used to apply tiles over ceramic, vitrified, mosaic and natural stone.

Solify GT-03 Granite Tile Adhesive

Solify GT-03 Granite Tile Adhesive is a specially formulated adhesive designed to meet the unique demands of granite tile installations. With its robust composition, Solify GT-03 ensures a secure and lasting bond for your granite tiles.

Advantages

- Superior Bonding Strength
- Suitable for granite, marble, and Kota stone
- Ready to use and easy to apply
- Capable of firmly fixing tiles on long heights of walls without slippage

Technical Data

GT 03

3.72 sq.m
@ 6 mm
(as per lab Conditions)

GT 03 is used for applying large size natural stones like granite marble etc, It was used for laying stone slabs on concrete base in floors and plaster base on walls.

Solify MT-04 white marble tiles Adhesive

Solify MT-04 White Marble Tile Adhesive is a premium, white marble adhesive, meticulously engineered for the installation of white marble tiles. Its specialized formula is designed to maintain the pristine appearance of white marble while providing a strong and durable bond.

Advantages

- High Adhesion Strength
- Moisture Resistance
- Rapid Setting
- Easy to apply

Technical Data

MT 04

3.72 sq.m
@6 mm
(as per lab Conditions)

MT 04 is a premium polymer modified white cement based tile mortar which is used to apply white marble and Italian marble over concrete and plaster base.

Solify BF-05 AAC Block Jointing Mortar

Solify BF-05 AAC Block Jointing Mortar is a specialized adhesive designed for joining AAC (Autoclaved Aerated Concrete) blocks. This adhesive, when mixed with water, forms a strong and durable bond between AAC blocks, ensuring structural stability in construction.

Advantages

- Strong Bond
- Quick Setting
- Low Shrinkage
- Faster Drying

Technical Data

BF 05

0.3-0.5 sq.m /kg
for 100 mm
thick block
(as per lab Conditions)

BF-05 is a high-strength adhesive for quick & firm laying of AAC blocks with thin joints. Made of cement, graded sand, and blended with polymers, it provides high strength and water retention properties.

Solify PF-06 Ready Mix Plaster

Solify PF-06 Ready Mix Plaster is a polymer-modified, ready-to-use plaster designed for both internal (plastering) and external (rendering) surfaces. It provides a smooth finish and a strong bond to the substrate. This plaster covers rough surfaces, creating a durable and protective layer against rainwater & other atmospheric elements. It also serves as a flat base for painting & speeds up construction.

Advantages

- Provides crack-free walls
- Ensures smooth plastering.
- Offers high compressive strength
- Ready to use

Technical Data

PF 06

0.85-1.0 sqm
@12mm

(as per lab Conditions)

PF-06 can be used for plastering on inner & outer walls. It can also be used effectively on brick, block, stone walls as well as concrete surfaces. Ideal for well-prepared walls with a maximum thickness of plastering up to 12 mm.

Tiles Spacer

It ensures the correct distance for tile installation, providing uniform gaps for a better and flawless finish. It helps to prevent uneven tiles and potential future issues, ensuring a long-lasting and durable installation.

Advantages

- Uniform Spacing
- Maintain Equal Distances
- Prevents Tile Shifting

Solify Tile Grout

Solify Tile Grout is a cementitious tile joint filler. It fills spaces between tiles, providing stability and aesthetic appeal.

Advantages

- Non-shrink and prevent cracks.
- Easy to use and apply
- Consistent color quality.

Solify Epoxy Grout

Solify Epoxy Grout is a three-component, high-performance grouting system. It is stain-free, crack-free, chemical-resistant, and waterproof. Ideal for filling joints in various applications.

Advantages

- Highly resilient and durable.
- Non-absorbent (waterproof).
- Resistant to stains and cracking.
- Withstands high humidity and extreme temperatures.

Solify Tile Cleaner

Solify Tile Cleaner is a specialized cleaner designed for tiles and grout. It effectively removes dirt, stains, and grime from tiled surfaces.

Advantages

- Efficiently cleans tiles and grout.
- Helps maintain the appearance of tiled areas.
- Suitable for various tile types.
